

The Tarping System for Today's Transportation Industry™

Excellent quality, dependable, fast, attractive and economical to own make EZ-LOC Roll-Up Tarp an asset to your farm operation. Hand made in the heartland of America, we use galvanized hardware and powder coated parts to ensure years of service.

Protecting your commodity every step of the way, we cover Grain Carts, Grain Trucks, Fertilizer Tenders and Hopper Trailers. EZ-LOC Roll-Up Tarp was built with today's agricultural industry in mind.

EZ-LOC® Tarp Quality Features

Secure handle quickly and easily with our specially designed crank retainer. No pins to release give you two handed control over crank handle providing an easier operation.

Unrolling is easier with our tarp return. It provides a pulling action that makes closing the cover a simple and effortless operation. This process will keep the tarp rolling evenly over bows and end caps.

Heavy duty 21 tooth spline u-joint lets you adjust tarp tension quickly and precisely.

A large variety of sizes ensure a custom fit every time. With 9 popular colors to choose from, EZ-LOC Tarp is the perfect addition to your grain transporting equipment.

Tarp includes a sewn on poly rope which slides into a unique channel design in an aluminum roll tube. This gives an even, consistent tension along the length of the tarp. No time consuming screws with plastic u-clamps means a quicker and easier installation.

ensures a long life while vinyl caps will keep your tarp protected.

Tarp comes standard with 18 oz. double-coated vinyl fabric that will not stretch in heat and remains flexible to -40°. It's tested and proven to provide protection in all four seasons.

Available Upgrades

EZ-LOC® Electric Motor Kit

Convert your EZ-LOC Roll-Up Tarp system into an electric. Kit includes a heavy-duty motor, adjustable motor extension, wiring, switch, new front tarp return, and hardware to relocate existing tarp return to rear.

EZ-LOC® Manual Rear Tarp Return Kit

Adding this kit to the rear of a manual tarp that has only a front tarp return bungee will help maintain a tight and even roll.

Replacement Parts

Replacement parts are available for both EZ-LOC Roll-Up Tarp and SRT-2 Roll Tarp. Call for more information.

Cover Your Profits Every Step of the Way

The SRT-2 Roll Tarps are our premium tarps that work with you - not against you. Our unique tension system provides a steady and smooth roll in all weather conditions including wind, yet it has enough flexibility to allow easy rolling over uneven loads.

The difference is in the detail. From our weldless, rivetless end caps to our heavy-duty 18 oz. fabric, we manufacture these tarps in the USA with quality components you can count on.

"I'm amazed at how easily it closes in the wind. I've owned several tarps before but none of them can compare to the SRT-2 tarp."

~ John Druem, IL

SRT-2™ Roll Tarps Manual Operation

Tarp Stores Neatly Along Box

Tarp stores neatly out of the way when open. It allows you to fill from either side reducing risk of tarp damage from loaders.

Roll It Open or Closed

Tarp takes only seconds to operate from the ground with no tie-downs. It remains secure during entire rolling operation, even in windy conditions.

Secure the Handle

Simply crank tarp over the box. Store the crank handle in its holder. Telescoping crank handle is stored away from doors and grain gates.

www.agricover.com 800-233-4655

SRT-2™ Roll Tarps Features

- 1 Built-in rib provides maximum weather seal, assists with tarp tension and end cap strength.
- 2 Front & rear end caps have a built in wind deflector and provides maximum weather seal. No welds to fatigue or rivets to fail.
- 3 Unique flex drive crank provides a smooth firm drive at a comfortable operating angle.
- 4 Ratchets set tarp's tension during installation. Set it and forget it.
- 5 Three inch extruded aluminum roll-tube with rope channel design. Allows fast tarp assembly and evenly distributed tarp tension.
- 6 Super durable nylon handle holders secure crank handle to side of box in both open and closed position.

- 7 Extruded aluminum quick release tarp stops are extremely durable and swing open for easy tarp removal.

Saving Time For A Profitable Harvest

An SRT-2 Electric Tarps can make your agricultural business safe and efficient. This dependable tarping system allows your tarp to be operated from the comfort of your cab.

Tarping on the go at low speeds eliminates downtime, increasing your production and profitability.

SRT-2™ Electric Tarps Benefits

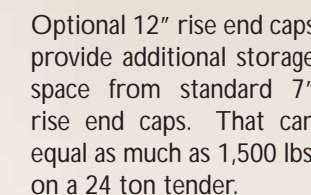

Electric motor and control arm mount to front of box, leaving rear free for swing open doors and easy unloading.

A rocker switch mounted near door frame allows you full control of opening and closing tarp to any position - from cab or when standing on ground.

Rolls up for easy loading. Hi-rise arched end caps increase capacity. Compatible with or without granular bins.

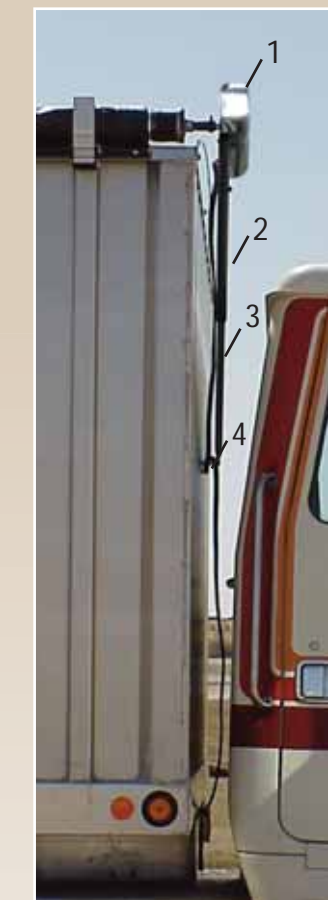

Optional 12" rise end caps provide additional storage space from standard 7" rise end caps. That can equal as much as 1,500 lbs. on a 24 ton tender.

Roll tube clearance may require minor boom rest modification on some units.

SRT-2™ Electric Tarps Features

- 1 Heavy duty electric motor with protective dust cover.
 - 2 Telescoping control arm is clean, simple and provides routing for power.
 - 3 Heavy six gauge wire delivers power from vehicle's battery to tarp motor.
 - 4 Electric components all mount neatly with a pivot bolt between cab and box.
- Included with kit is a cab mounted rocker switch, solenoid, automatic breaker and all miscellaneous hardware.

An electric motor kit easily converts your existing SRT-2 Roll Tarps hand crank system into an electric - all hardware and instructions included.
